## Excel Micro Code to Change All Text in a Range to Upper case, Lowercase and Proper Case

Present by: [Exceldoeasy.weebly.com](http://Exceldoeasy.weebly.com)

### A Macro Code to Change All Text in a Range to Uppercase Letters

```
Sub Uppercase()  
'exceldoeasy.weebly.com  
  ' Loop to cycle through each cell in the specified range.  
  For Each x In Range("A1:A10")  
    ' Change the text in the range to uppercase letters.  
    x.Value = UCase(x.Value)  
  Next  
End Sub
```

### A Macro Code to Change All Text in a Range to Lowercase Letters

```
Sub Lowercase()  
'exceldoeasy.weebly.com  
  ' Loop to cycle through each cell in the specified range.  
  For Each x In Range("B1:B10")  
    x.Value = LCase(x.Value)  
  Next  
End Sub
```

### A Macro Code to Change All Text in a Cell Range to Initial Capital Letters

```
Sub Proper_Case()  
'exceldoeasy.weebly.com  
  ' Loop to cycle through each cell in the specified range.  
  For Each x In Range("C1:C10")  
    ' There is not a Proper function in Visual Basic for Applications.  
    ' So, you must use the worksheet function in the following form:  
    x.Value = Application.Proper(x.Value)  
  Next  
End Sub
```
